Function (Functions)
evaluateAt(), derivativeAt(), integralInRange(),
derivativeFunction()
Interpolation
PiecewisePolynomial (a Function)
a polynomial on each interval;
exact derivativeAt(), derivativeFunction(),
integralInRange()
Linear,
splines
Interpolation (a Function)
table (x_i, y_i), x increasing
enum Method: Nearest, Linear, LocalPolynomial,
Polynomial, Spline, NaturalSpline,
ClampedSpline, MonotoneSpline
exact derivatives and integrals for
Linear and the splines
CubicSpline
enum Kind: Natural, Clamped,
NotAKnot, Monotone (Fritsch–Carlson)
tridiagonal (Thomas) solution
Nearest, polynomials
InterpolationTools (functions)
findInterval(), localWindow(),
interpolatePolynomial() (Neville),
interpolateLocalPolynomial(),
inverseLinearInterpolation(), interpolateMultilinear()
MathBasicInterpolation
legacy functions: nearest, linear
and cubic, on uniform or monotone
tables
ScalarField
multilinear
RandomDistribution,
BasicEventGen (inverse CDF)
FiniteDifference
(Derivative): localWindow()
