defaults
Derivative
Derivative (a Function)
derivative of order n of f along an axis,
or mixed (axes); evaluateAt(), update()
Differentiation
enum Method: Automatic, Analytical, Linear,
Quadratic, Cubic, Polynomial (degree)
derivative(), partialDerivative(), mixedDerivative(),
gradient(), derivatives() of sampled values
step, Richardson extrapolation, Stencil
ScalarField (LinearAlgebra)
gradients on its grid
FiniteDifference (functions)
enum class Stencil: Central, Forward, Backward
finiteDifferenceWeights() (Fornberg),
finiteDifferenceOffsets(), finiteDifferenceStep(),
derivativesOfSamples(), derivativeOnGrid()
